

Diagram illustrating a matrix-vector multiplication:

- A green horizontal rectangle labeled $\mathbf{V}^H$ is positioned above a large blue square labeled $\mathbf{A}$.
- To the right of $\mathbf{A}$ is a green vertical rectangle labeled $\mathbf{V}$.
- An equals sign $=$ follows $\mathbf{V}$.
- To the right of the equals sign is a small blue square labeled $\tilde{\mathbf{A}}$.

Diagram illustrating a matrix-vector multiplication:

- A green horizontal rectangle labeled $\mathbf{V}^H$ is positioned above a blue vertical rectangle labeled $\mathbf{b}_p$.
- An equals sign $=$ follows $\mathbf{b}_p$.
- To the right of the equals sign is a small blue vertical rectangle labeled $\tilde{\mathbf{b}}_p$.

Diagram illustrating a vector-matrix multiplication:

- A blue horizontal rectangle labeled $\mathbf{c}_{q_\theta q_\phi}^H \{\hat{\theta}, \hat{\phi}\}$ is positioned above a green vertical rectangle labeled $\mathbf{V}$.
- An equals sign $=$ follows $\mathbf{V}$.
- To the right of the equals sign is a small blue horizontal rectangle labeled $\tilde{\mathbf{c}}_{q_\theta q_\phi}^H \{\hat{\theta}, \hat{\phi}\}$.
